How does this schedule work:

Station 1: Examination room 1 in hospital (2nd building)
 Station 2: Examination room 2 in hospital (2nd building)
 Station 3: Radiography room (2nd building)
 Station 4: Scintigraphy room (1st building)
 Station 5: Physiotherapy room (1st building)
 Station 6: Transrectal US (White tent at second parking lot)

Example

Group A1 starts at Station 1, rotates to Station 2 etc.
(Group A6 rotates to Station 1, etc.)

The organisation hopes this schedule fits in everyone's expectation.
Changes are possible: switch with other people and let our ISELP
coordinator, Mrs. Bo Staal, know before Friday afternoon 3 pm.

This schedule will be respected: no extra people allowed in a group.
